Jeff

Some other concerns to address are diseases carried by coyotes(google this topic) but more concerning is why they are killing prey and not consuming the kill,you may not be dealing just with coyotes or they are becoming very protective of their territory.Google coydogs and coywolves in ont coydogs are bad for killing for the sake of killing ! Also the MNRF has strict law on relocation of any wildlife animal,up to 1 km from capture location.

best wishes

Russell,

Thank you for your interest. I did not see the proposal from the Town. The mayor forwarded your contact information via email. Happy to review your thinking and see how we can solve this issue.

Regards,

Jeff Brown
